Dear Authors,

The 2019 SRF-*Reproduction* Prize will be awarded at [Fertility 2020](#), to celebrate and distinguish excellence in reproductive biology research. The prize recognises the best research published in SRF's journal *Reproduction*. Further information about the prize can be found [here](#).

We are delighted to inform you that following an extensive assessment process by the *Reproduction* Editorial Board, your author group has been selected as the winner of this prize.

This award is for your paper 'Long-term exposure to very low doses of bisphenol S affects female reproduction' published in *Reproduction* in July 2018.

We hope that you will accept this award on behalf of the Society for Reproduction and Fertility. The award is made to the whole author group and each author will receive a certificate. One author is invited to attend [Fertility 2020](#) in Edinburgh, UK, with travel, registration and 3 nights' accommodation covered by SRF. As SRF aims to support reproductive scientists in the early stages of their career, we ask that the first author attends wherever possible. Though we are only able to cover costs of attendance for one member of the winning author group, we would be delighted to welcome other members of the group to the conference. The first author will present your work in a dedicated award session in the Fertility programme, on Wednesday 8<sup>th</sup> January 2020 from 17:50 – 18:20. If you are not current members of SRF, all authors will receive 1 years' complimentary membership.

I should be grateful if you could confirm your acceptance of the award and that the first author will be attending the Fertility 2020 conference to accept the award certificates and present your work. Following your acceptance we will make details of this award publicly available and will assist with arrangements for attendance.

Congratulations! We very much hope that you will continue to choose *Reproduction* when publishing your research.

Yours sincerely

Professor Colin Duncan  
SRF Council Chair

Professor Richard Lea  
SRF Programme Secretary

Dr Greg Fitzharris  
Co-Editor-in-Chief

Professor Chris Price
